

This Project is funded by the European Union

CALL FOR EXPRESSION OF INTEREST Under Competitive negotiated procedure

Individual Experts or companies to be appointed for developing a software application for an interactive totem in the framework of the IPA ADRIATIC funded project: «Adriatic Model of Sustainable Mobility in the Health & Care Sector-AdriHealthMob».

INNOPOLIS, Corfu, Greece
23/05/2016

1. Aim of the call

This call of expression of interest is published by InnoPolis - Centre for Innovation and Culture (InnoPolis) in the framework of the implementation of the project called “Adriatic Model of Sustainable Mobility in the Health & Care Sector-AdriHealthMob” funded by the IPA ADRIATIC Programme - Strategic.

The aim of the call is to collect the expression of interest of companies or individual experts which are willing to respond further to the detailed tender dossier (if short-listed) and bid for undertaking specific tasks for the successful implementation of the project’s activities that are detailed here below.

Individuals or companies preliminarily interested should express their interest via either e-mail to the following address: innopolis@otenet.gr or post or by hand delivery to the following address: Iasonos and Sosipatrou 13, P.C. 49100 Corfu, tel: +30 26610 32428 fax: +30 2691062904/ e-mail: innopolis@otenet.gr till **23/06/2016**. They should send a letter of interest as well as their profile with references related to the activities hereunder. Shortly after, InnoPolis will prepare a short list of suitable and interested companies / individuals who will be invited to participate in the second step of offering their services replying to a detailed tender dossier with Annexes which will be communicated to them.

AMOUNT OF THE TENDER: € 25.000,00 (VAT incl)

2. Description of activities

The contractor has to implement the following activities (according to the Actions mentioned in the detailed approved application form)

Action 6.3: Cross-border Health Mobility Info Point

The AHM indoor interactive totem is to be placed in airport terminals or borders offices or other tourist populated public places of various Countries participating in AdriHealthMob Project. These Totems are meant for travellers, waiting or passing through the terminal, to interact with and coincidentally engage in health and/or to find information (name, specialties, addresses, street directions, etc.) related to Health Actors and Health/Care Organizations operating in the area, by using Totem’s touch screen. Same type of information will be accessible via a dedicated mobile application.

By considering the above mentioned details, the services required are the following:

1. Development of the user graphic interface of the totem that has to be very user friendly and attractive, in order to attract potential users.
2. Development of n.2 Sections of the Totem:
 - a. **Health Map:** for this service the subcontractor is requested to:
 - i. Develop the database of Health Actors (e.g. doctors, physicians, etc.) and Health/Care Institutions that will represent the basis of the Map. The information will be given by Project Partners to Innopolis (according to the datasheet file in Annex I).
 - ii. Create the interactive map that users can navigate through the touch screen. The Health Map should be accessible in 2 ways: directly on the map, showing all the Points of Interest (POI), and these can be filtered by some criteria (e.g. Cardiologists) or after a research made by the user through some simple queries (such as diseases, distances, other) N.B. For each POI on the map has to be visible the main information such as the name and address.
 - iii. Define a journey algorithm that can display on the map the path to be done reach the POI, by car.
 - iv. To develop a mobile application of the Health Map.

- b. **AHM Information:** for this service the subcontractor is requested to prepare a section with all the information of the project: objectives, activities, results and outputs, plus a direct link to the Web Page and Portal of AHM Project. The texts of this section will be given by InnoPolis, after the agreement with the Lead Partner of AHM.

N.B. All the information included in the Totem has to be in the following Languages:

- Bosnian
- Serbian
- Montenegrin
- Croatian
- Albanian
- Italian
- Greek
- English
- Slovenian

Each partner should translate into English and into its native language the menu of the software and all the content to be uploaded on the platform.

3. **Guidelines** to all Partners to install the software in their totem and on-line support only for the first installation of the software in each totem.
4. **On line training/ tutoring** to all Partners related to the SW developed: use, maintenance and updating.
